

## School Component – Academic Credits Earned

We are, truly an authentic, experiential learning substance abuse high school program that is culturally based around Alaska Native practices. We are under the umbrella of **Sitka High School**, but function with autonomy. The pedagogy is designed to transpire through culturally relevant, place-based learning that is driven by products indicative of a student's learning and therapeutic progress. All academic products are connected to national competencies & state standards. All students that embrace the curriculum and counseling culminate with a high-quality presentation at graduation.

Students spend their entire experience at Raven's Way answering the guiding question: ***How do I live a healthy and culturally enriched lifestyle?*** When a student leaves the program, they are empowered with coping skills and knowledge about substance abuse, family dynamics & the process of addiction. Raven's Way is geared to accommodate the whole student.

Due to the intensity of our program and the time commitment, we are able to successfully set-up our students through product driven work that will meet the students' credit needs within the following subjects. Upon graduation from our program a student will earn:

0.5 credits in Physical Education

0.5 credits of AK Studies

0.5 credits of Health

0.5 credits of English Content

0.5 to 1 credit of elective depending on products, time in the program and level of competency.
