In/Out of Bed							

Can applicant walk up and down stairs unassisted? No Yes

Is applicant ambulatory? No Yes

Applicant uses Walker Cane Crutches Wheelchair Other _____

Is applicant bedfast? No Yes

Does applicant require assistance in transfer? No Yes

Placement “Levels of Care” in Long-Term Care Setting

- Assisted Living Facility (ALF): Placement option promoting independence for those who are no longer able to live on their own safely and don't require the high level of care in a nursing home. (ie: help with medications, activities of daily living, meals and housekeeping). **SEARHC is not licensed as an Assisted Living Facility.**
- Skilled Nursing Facility (SNF): Treatment of an unstable condition requiring licensed nursing staff available 24 hours/day to provide direct care or make decisions regarding the care. (ie: bedsores, wound care, tube feeding, tracheostomy care, medication adjustments for intractable pain)
- Intermediate Care Facility (ICF): Treatment of a stable condition not requiring skilled nursing services, but professional medical or nursing supervision. Emphasis is on maintenance rather than rehabilitation. i.e., stroke, require assistance with two to five activities of daily living.
