

MySEARHC Quick Reference Guide

Viewing Medications

Access current active medications from the *Dashboard* cards and the *Medications* page.

<div>1</div>	Dashboard: What's New	<div> Dashboard: What's New  </div> <div> Dashboard: Medications  </div>
--------------	------------------------------	---

- Select the **Medications** new activity link

NOTE: What's New lists quick links to new items available within the last three days.

NOTE: Please request refills directly from your Pharmacy.

Dashboard: Medications

- Select the **medication name** (e.g., acebutolol) to view details

NOTE: Select **View all medications** to access the *Medications* page.

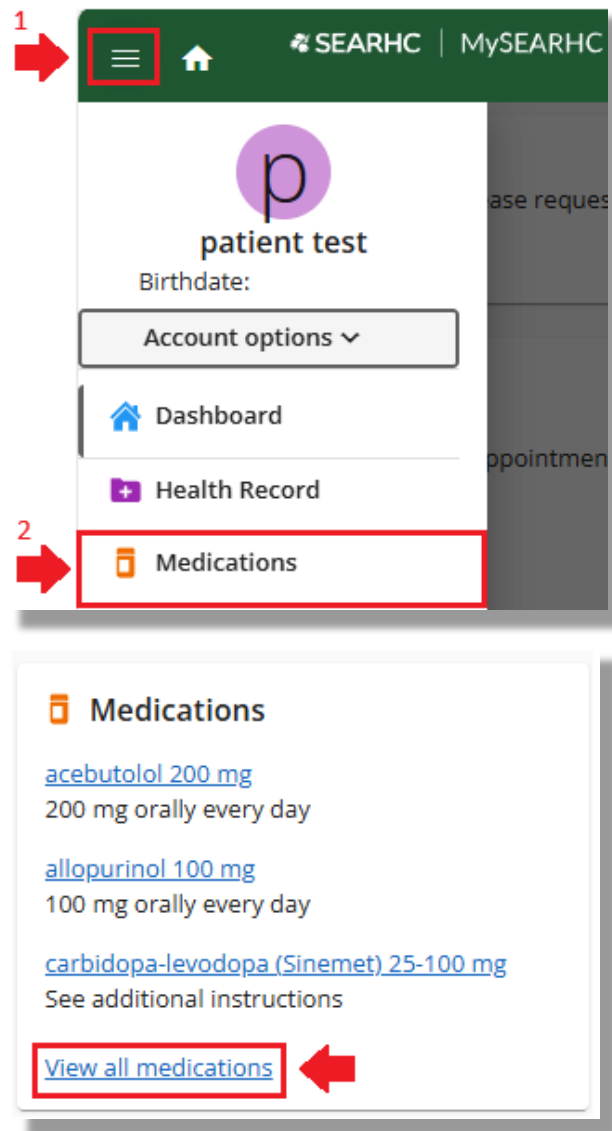

2

Accessing the **Medications** page:

- From the MySEARHC Dashboard, select the **3 line icon**, located to the left of the Home icon.
- Select **Medications**

From the **Medications** card:

- Select **View all medications**

3

Accessing Medications:

Reconciled active home medications display directly on the page with information such as:

- Name
- Dose
- Instructions

NOTE: Use the *Sort by* option to customize how items display on the page.

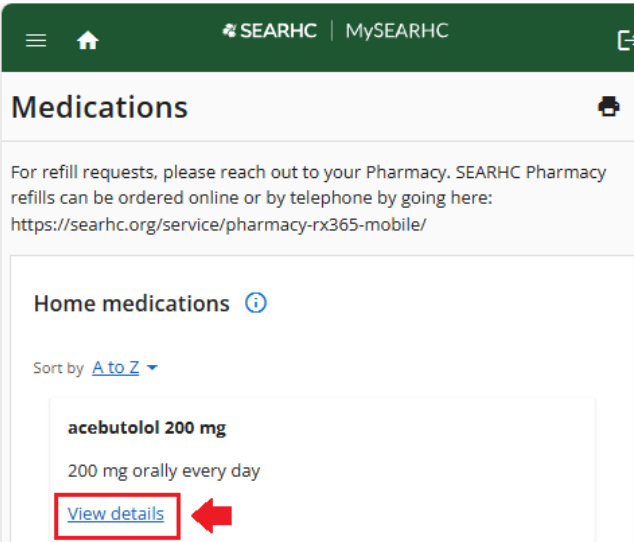

Viewing Medication Details:

- Select **View details**

NOTE: The *Medications - Details page* displays additional information such as medication form (e.g., capsule), route, and prescribed by provider name.

NOTE: Select **More information about this medication**, when available, to view the monograph data.
